Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 18-48, 71-73, 75-104, and claims 1-17, 49-70 in part, drawn to a compound wherein X is H, H, class and subclass various dependent on the species elected, its composition and method of use.
 - I. Claims 74, 105, and claims 1-17, 49-70 in part, drawn to a compound wherein X is a single bond, $-(CH_2)_n$ or $-CH=CH-$, classified in class 564, subclass 170 or 18, its composition and method of use.
 - II. Claims 1-17, 49-70 in part, drawn to a compound wherein X is $-CH_2-W$, S or NR^5 , classified in class 549, subclass 26, 12, 354 or class 546, subclass 104 or class 540, subclass 586, dependent on the species elected, its composition and method of use.
2. These inventions are structurally, chemically and patentably distinct. They have acquired a separate status in the art as shown by their different classification. A reference anticipating group I invention would not render obvious the Group II or Group III invention. The search is therefore not co-extensive and is burdensome. Since the search required for Group I is not required for Group II or Group III, restriction for examination purposes as indicated is proper.
3. Applicant is advised that the reply to this requirement to be complete must include ***an election of the invention, and a species within the elected invention*** to be examined even though the requirement be traversed (37 CFR 1.143).
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
